I believe I have the C-hgtz - 2746.3 ft., from the COX 3 ft. contour, and the 2007 DLS elevation. This is the same elevation as the 2007 COX contour, and equal to 241 ft. above sea level, and 36' less than the 2007 DLS elevation. I am not sure if this is the correct elevation, but it is the same as the COX contour.

Top of the hill is, and equal to 241 ft. above sea level, and 36' less than the 2007 DLS elevation. I am not sure if this is the correct elevation, but it is the same as the COX contour.

Top of the hill is, and equal to 241 ft. above sea level, and 36' less than the 2007 DLS elevation. I am not sure if this is the correct elevation, but it is the same as the COX contour.

Figure 10. The effect of the number of hidden neurons on the performance of the proposed model.

“*It is the first time I have ever seen such a thing. It is like a dream.*”

the first time in the history of the world, the people of the United States have been called upon to decide whether they will submit to the law of force, or the law of the Constitution.

For the first time, we have shown that the *liver* is a major site of *in vivo* synthesis of *liver*-specific proteins.
