RE: MDC

Wilson

Andrew Winkelman, Systems Engineer at UVA, requested support to locate the MDC train's training test facility in Parking Lot 91 north of the Vireolar Building. The test facility includes a 20' concrete structure with a power system, and a piece of equipment is 10' x 10' x 10' in size. The site seems to be the best location due to its close proximity and the site's topography, drainage and the clear view of the building. In the meeting, the issue was discussed, but Winkelman is an issue, as well as solar visibility.

MDC recommends approval of the training test facility in parking lot 91 north of the Vireolar Building, with the following recommendations:

- Facility, to be approved with MDC
- WATC will either remove the equipment after three years through the MDC
- WATC will sign the lease
- WATC will occupy an 8' x 10' for three parking spaces
- WATC will be consulted with EUCEDM, Engineering Services, and Facilities Services with those units concerned
- The training facility is self-sufficient and will not be connected to campus power

Motion made by Gary Newman seconded

Motion carried unanimously.
